Milk River

Three Cases of Smallpox Discovered in Community; Every teacher "Exposee"

Indignant Parents Demand School Be Closed

Milk River (Special)—For a week, Milk River has been raging with a controversy over the diagnosis of several severe cases of what was thought to be measles, then chickenpox. Finally the town council sent for a government doctor from Edmonton, who definitely stated that at least three cases were smallpox.

A furore of excitement resulted. One of the town teachers, Miss Betty Baldwin, definitely has the disease. Practically all the other teachers have been "exposed." Many of the parents demanded that the school be closed. One irate parent declared, "if my family get the smallpox I'll tear this town to pieces." However school goes on, and a substitute teacher, Mrs. Tweedie has taken the place of Miss Baldwin.

One result of the epidemic has been a wild rush for vaccinations. Dr. Giles has been even more busy than he was a few months ago at the time of the infantile paralysis outbreak.

Former Busy Town Fading Fast Away

Retlaw (Special)—The first building to be erected in the village in 1913 by the late G. F. Podoll, has been sold to Mr. Danielson of Vonnahall, and is being moved away. This building, for many years known as the municipal office was conveniently situated in the centre of a one time busy business block.

Today only one small building used as a post office, remains in the block. With the removal of the buildings and the condition of the streets and crossings, this one time prosperous town presents a sorry sight.

Mr. Lloyd Robinson who has been in Calgary for the past week, returned Wednesday morning

Mr. Jas. Duck, night agent of the C. N. R. who has been at Blackfaulds for a few weeks with his father who is ill in the hospital, returned Tuesday

Mr. Geo. Anderson who was in Calgary last week, returned Sunday.

WARNING TO FARMERS

Warning to farmers of this district! Mr. Seamans, Dominion Entomologist, has warned us of a heavy infestation of pale western cutworm in this area. As a control measure, Mr. Seamans advises farmers to cultivate crop land, after weeds have started, leave for 10 days then seed.

H. J. Westphal

Dry Area Conference

Called at Lethbridge A meeting was held in Lethbridge on March 16-17 of all presidents and secretaries of Agricultural Improvement Associations in the drought areas supervised by the Lethbridge experimental station. Topics such as regrassing and water conservation were discussed

Approximately 1,200 head of Alberta horses have been disposed of since the first of the year, with the market still holding steady and the demand so far showing no signs of serious slackening, local dealers told the Calgary Herald.

Mr. J. C. Cottrell, of Cereal got up out of bed and walked around his house while still sleeping, and struck against a sharp corner of a piece of furniture, breaking two ribs. After Dr. Esler attended him, he took the train on Wednesday morning for Hanna, where his daughter, Mrs. M. Wolf will look after him.

"Gee, Mom—this is good!"

THAT'S WHAT THEY SAY WHEN YOU SERVE...

dried or Pickled

FISH

● ARE YOUR children fussy about food? Have they likes and dislikes?

Give them Dried or Pickled Canadian Fish, fixed up in one of the tasty dishes that can be made with this food.

You can get such Dried Fish as Cod, Haddock, Hake, Cusk and Pollock, and such Pickled Fish as Herring, Mackerel and Alewives, no matter how far you live from open water. It comes to you in perfect condition, every bit of its flavour retained for your enjoyment.

It's grand for the family's health... fish contains the proteins and minerals that help build sturdy bodies... and it's economical, too.

Serve fish more often... for the health and nourishment of the family.

Universal Fingerprinting

For some reason or other, hard to explain, proposals that citizens submit themselves to voluntary fingerprinting as a means of subsequent identification in the event of emergency, have met with nothing but indifference, if not actual aversion on the part of the general public in this country.

This is somewhat surprising when one considers with what enthusiasm this proposal has been received in the United States and some other countries where numerous organizations have taken up the movement and have been successful in interesting the average citizen to a considerable degree.

Possibly the fact that hitherto fingerprinting has been associated solely with the identification of criminals may have something to do with the average Canadian's "cold shoulder" attitude towards fingerprinting, for the general mill run of Canadian citizen is essentially law abiding and is apt to resent the slightest hint that he is not; and this mistaken viewpoint towards fingerprinting may account for his attitude.

On the other hand the diffidence with which suggestions and invitations for fingerprinting on wholesale but voluntary basis have been received in this country to date may be due to lack of knowledge of the benefits which such certain means of identification would confer generally, not only upon the individual but on the entire community. In all probability this is the principal reason for lack of interest in and response to this method of indexing for identification in Canada.

Has Many Values

A dozen ways in which universal fingerprinting would be of value to the individual citizen and the community to date were set forth recently in a letter appearing in an Ontario daily newspaper by John Tenbroeck of Thorold, Ont., as follows:

"1. Elimination of election frauds; 2. Elimination of insurance frauds; 3. Minimization of immigration and emigration frauds; 4. Prevention of fraudulent evidence and repudiation of signatures on deeds in legal proceedings; 5. Elimination of impersonations; 6. Confirmation of marriages and bigamy rendered impossible; 7. Prevention of the substitution of a corpse for the body of another; 8. Elimination of dope fiends, insane persons and alcoholics;

"9. Regarded by the writer as very important: (a) Prevention of the physically unfit from obtaining an automobile license, (b) License carriers would be unable to operate by giving a false name when caught violating the law, (c) Persons permitted to drive driving privileges would be permanently ruled off the highway, (d) As a consequence of better operators an immediate decrease in our appalling death rate on the highways would result;

"10. As a result of decreased deaths and injuries on the highways there would be a corresponding drop in automobile insurance rates; 11. People suffering from loss of memory could be quickly identified, saving relatives money and perhaps a lifetime of worry and uncertainty; 12. Establishment of the true identity of the unknown dead, thereby saving the public the cost of burying them. The number of people buried in nameless graves was 46,000 last year, costing the public from \$50 to \$150 each for their burial."

Reducing Accident Toll

As Mr. Tenbroeck intimates there can be no question of the value voluntary fingerprinting could be made to exert in reducing the toll of accident and death on the highways, if it were made to serve some of the purposes he outlines in his item No. 9. The growing toll of loss of life and property from this cause is verified in recent statistics for last year and is already being reflected in increased automobile insurance rates.

On this ground and this alone, there should be general support for the movement for universal fingerprinting on the part of all who themselves make reasonable use of the automobile and the highways and who are constantly endangered by a reckless minority.

"Millions of men were fingerprinted during the World War, said Mr. Tenbroeck, urging support for universal fingerprinting. "It provided," he reminds those who may have forgotten the fact, "an inviolable record through which identity could never be lost, through death, through injury, loss of memory or any other way incident."

"To-day in many countries, and especially in the United States of America, universal fingerprinting is progressing by leaps and bounds. Rotary, Lions, Kiwanis, Kinsmen, Y.M.C.A., clubs etc., in many localities and States, where drives are being put on for civil fingerprinting registrations, are solidly behind this move. The American Legion, women's clubs, church societies, etc., are working for it."

Police Approval Intimated

Indications are that support will be given the movement in Canada at the annual convention of police chief constables in the summer, as the arguments put forward by Mr. Tenbroeck are reprinted with approval in a recent issue of the Canadian Police Bulletin with a suggestion that "police chiefs should be taking every opportunity to impress the advantages of universal fingerprinting upon the public whom the proposal is designed to serve."

"A warm bath stimulates the imagination," says a doctor. "This explains why a man who has taken a warm bath will come downstairs boasting that he has just had a cold one."

Kept Title And Decorations

Enemy Subject Of Great Britain Once Gave Services To Empire

The late Baron Sir Rudolf Carl Von Slatin Pasha was at one and the same time, an Austrian baron, an English knight, an Egyptian pasha. Briefly, what Lawrence was to the Sudan, says Richard Viner in the Daily Sketch, he served four thrones—Queen Victoria, King Edward, King George and the Emperor of Austria. He died in 1932, aged 75. On January 26, 1885, the head of General Gordon was brought to Slatin Pasha as evidence of the fall of Khartoum. On January 26, 1893, the latter's daughter flew to the scene of her father's triumph and imprisonment. Twenty-two, she is Baroness Winterstein-Gillespie, married to a brilliant young radiologist, half-Austrian, half-English. They live in London. Captive for 11 years Slatin Pasha returned after a romantic escape to become Inspector-General of the Sudan until the Great War. Then he returned to Austria. But for his services to Great Britain neither title nor decorations were taken away. Despite his being an enemy subject the War Office even continued to credit his pay.

HE SUFFERED AGONY IN WET WEATHER

Rheumatism Attacked Limbs And Body

He had been bothered with rheumatism for years. The pain in wet weather—to use his own expression—was "indescribable." But all that is gone now—thanks to Kruschen. Read this letter: "I suffered with rheumatism for years. I dreaded wet weather, for during such periods the pain was continuous and indescribable. To begin with, it was confined to my limbs, but in time I began to suffer as much agony in my body as I did in my limbs. When I began to take Kruschen Salts, I found it did me more good than all the other medicine I had taken put together. To-day, I have peace and freedom from pain, even during wet weather, and can heartily recommend Kruschen Salts to anyone who suffers from rheumatism."

Rheumatic conditions are often the result of an excess of uric acid in the body. Two of the ingredients in Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients in the Salts assist Nature to expel the dissolved crystals through the natural channels.

GRACEFULLY FLAILED SKIRT ENHANCES DAINTY AFTER-NOON FROCK!

By Anne Adams

A really exciting frock—this refreshing Anne Adams model, for it's not only just what you'll be needed for Spring and Summer afternoon wear, but you'll find it easy as A B C to make at home! You'll look very best in the dainty Y-neckline that's accented by a feminine bow, attractive yokes, and demure puffed or flared sleeves. What's more, you've a graceful flared skirt that adds the final touch of charm to the delightful frock. Can't you just picture Pattern 4735 stitched up in a soft triple shawl, inexpensive flowered synthetic, or for warmer afternoons—in shadowy chiffon?

Pattern 4735 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 42. Size 16 takes 4½ yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (50c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send in order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

HOLIDAYS, WITH PAY, FOR FLIN FLON MINERS

I had heard of this unusual, but very humane, treatment of employees to men on daily pay, so went into the subject pretty thoroughly at the mines.

This year (1937) there are 1,109 men enjoying holidays at the firm's expense, 920 of them being wage workers and 189 on salary. They will have an average of nine days each, which means they have been employed four years, as the basis is one week after two years and an extra day each year up to two full weeks.

I found that of the 1,417 men employed during 1935 only 2½ were not in the plant at the end of the year. 1550 was the average during 1936, and 1,720 are now on the pay roll.

I saw some of the men on the train returning to the mines after their holidays. Most had gone home for marriage and a new automobile for their parents, but they actually seemed happy to get back to the life at the mines.

Single men live in bunk houses on the company property or board around the town, but they seemingly won't stay single long. The Company has had to convert many of its bunk houses into apartments for married men. At present the numbers are 966 married and 722 unmarried.

Most of the travelling round town is done on Shanley's Mars, but where there were only about 10 autos last year, there are now nearly 200, including taxis and a new scheduled service running to Phantom Lake at 25c return.

It should not be much longer before good roads reach this district from Saskatchewan and Manitoba. There's a heavy agitation now to use southern Saskatchewan farmers and their teams to build roads in the North and thus help out both sections.

All these developments are making Flin Flon a better place to live in. Another one being the good roads that are being finished and a summer resort and hotel this year established at Beaver Lake, 22 miles away.

You have a lot of good stories coming yet about Flin Flon, but just here I want to thank the Hudson Bay Mining & Smelting Co., Ltd., officials at both Winnipeg and the mine—and also the town authorities at Flin Flon—for their willing cooperation—not were they care for publicity—but they're all doing a wonderful job for Manitoba and Saskatchewan and thus prospering individually as well.

Crown Of Conquered Ruler

Has Been Taken From Ethiopia To Premier Mussolini

The jewel-encrusted crown of conquered Ethiopia has been presented to Premier Benito Mussolini.

It came received the symbol of vanished Ethiopian glory from Marshal Rodolfo Graziani, former Italian viceroy of Ethiopia, who brought it from Addis Ababa, together with Haile Selassie's imperial scepter.

Both were captured when the Ethiopian capital fell to the Italians in May, 1936. Mussolini ordered that the gold crown and scepter be placed on display in Rome's Colonial Museum.

It came congratulated Graziani on his work in Ethiopia, especially for his victory on the southern front in the Ethiopian campaign.

The government announced that 136 Italian workers had died of illness or accident in Ethiopia from December, 1937, to February. The new deaths brought to 1,732 Italians officially reported dead there since Jan. 1, 1935.

Lost Mining Stocks

Located In Mattress Purchased At Auction Sale

E. J. Prescott, Great War pensioner, brought a mattress at an auction sale. As he unloaded the mattress at his modest bungalow home in Calgary an envelope dropped to the ground.

"I was going to give it to my little girl to play with, then I saw it contained stocks of some kind," he said. The envelope contained mining shares worth \$300.

He immediately notified police and the owner, Mrs. C. E. Kilner, of Calgary, was found. The stocks were returned to her two hours before she boarded a train en route to England.

First Indoor Flight

An indoor flight was made for the first time in history when an aeroplane was flown in a closed hall. An autogyro, designed by Professor Focke and piloted by Captain Hans Kricheldorf, to whom Marshall Goetting gave the title of flight-captain, rose to the roof of the Deutschlandhalle, Berlin, flew along, turned round, and descended without mishap.

Government railways of South Africa are trying dry ice in refrigeration cars.

WORKS IN 2 WAYS ON DISCOMFORT OF COLDS

1. Take 2 "ASPIRIN" tablets and drink a full glass of water. Repeat treatment in 2 hours.

2. If throat is sore from the cold, crush and add 2 "ASPIRIN" tablets in ½ glass of water. Gargle twice. This soothes throat, relieves soreness almost instantly.

No family need neglect even minor head colds.

Here is what to do: Take two "Aspirin" tablets when you feel a cold coming on—with a full glass of water. Then repeat, if necessary, according to directions on each package. Relief comes rapidly.

The "Aspirin" method of relieving colds is the way many doctors approve. You take "Aspirin" for relief—then if you are not improved promptly, you call the family doctor.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited of Windsor, Ontario, Ltd. for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Opinion Of Noted Artist

Kathleen Shackleton Says Canada Has Everything She Wants

"Canada has everything, it is the only country for me," said Miss Kathleen Shackleton, noted artist and sister of the late Sir Ernest Shackleton, in an interview at Vancouver.

"In the older cities Canada has culture and sophistication, in the northern areas pioneer life, and vast unexplored places. In the newer regions there is simplicity and sincerity."

"I would rather live here than anywhere. London may be a fascinating playground for the tourist, but to me it is just a crowded center of heads and brains. I am tired of them. I like to live closer to the earth, closer to people of the pioneer type," she said.

During the past few months, Miss Shackleton has made portrait sketches of northern and native types for the Hudson's Bay Company's headquarters in London.

Have Economic Value

Birds Are Also Cheerful Things To Have Around Neighborhood

Birds have an economic value in eating harmful insects and weed seeds. They have an ethical value in cheering our days with their songs and flash of color. They may be inclined to take up their abode in our own yards if we offer them a residence, rent free. Encourage your boys to construct one or more of these bird dwellings in their spare hours. This will be good for both boys and birds.

Summer birds, which do not require houses, may be lured to our neighborhoods by putting out bits of feathers, wool and twine in the nest-building season.

Sensible Advice

A doctor gives the following medicine don'ts: Don't increase the dose of medicine prescribed by the doctor. Don't take medicine in the dark. Don't use medicines that have stood on your shelves a long time. Don't forget to read the label carefully. Don't neglect to shake the bottle well.

Everybody seems healthy, though, and nobody in want, which is a good situation when you're 580 miles from Winnipeg and there's only one train every second day. This, by the way, is an ideal thing for keeping out undesirable and few who are not wanted stay long in Flin Flon.

HOW FLIN FLON WAS NAMED

You read about this earlier in our article but the original book was either completely worn out or lost. With the development of the mine, an interest in the book was aroused and a search for a copy began. First it was found that two editions had been published in London, one in 1905 at 18s. and one in 1911 at 6d., but the publishers had gone out of business in 1914. The bookstores of London and New York were canvassed without avail. The libraries of the world had no copies in their files. Advertisements in literary papers brought no replies. At last, in 1932, a copy was located in the British Museum as a part of the files of the British Government but, of course, this copy was not available. In 1935, after the search had been abandoned, a card was received from one of the large London bookshops. It read, "We have located the book which you require. Please forward 3s. 6d." The book, a cloth bound volume of 316 pages, the 1905 edition, arrived in the time and is now carefully preserved in Flin Flon by Jack Carr, its owner, and superintendent of the zinc plant.

Flin Flon found his gold. The prospectors found their gold with copper and silver and zinc as well. Just to show you that I really saw the book, I made a sketch of the cover and inside frontispiece page. Here they are:

THE SUNLESS CITY

By J. E. PRESTON-HUDDOCK

The Sunless City

By J. E. Preston-Huddock

From the Papers and Diaries of the late Josiah Flint Huddock

London—F. V. White & Co., Ltd., 14 Bedford St., Strand W.C., 1905.

Ed. Note: J. E. Preston-Huddock wrote largely under the pen name of "Dick Donovan", and the notice of his death appeared in the Winnipeg Free Press of January 25, 1933, and in the Flin Flon Miner issue of Feb. 1, 1934.

Victoria Sets Dates For Show With New Contestants

Snowdrops are up, violets in bloom and with daffodils in flower people in Victoria are all of a dither about the spring garden party. Which, believe it or not, lasts eight days and is unique on the Pacific coast. Elsewhere, too, for the matter, of fact.

With the dates set for May 4 to 11 inclusive, a very nice selected committee is currying-coming Victoria's list of gardens.

In addition to well-known estates such as those belonging to Lady Bernard at Esquimaux, Mrs. W. C. Nichol, Seaton, and Mrs. C. H. Barnard, Mrs. Biggarstaff Wilson, all sorts of garden enthusiasts have gone to Victoria to live, whose gardens, up-to-date, their owners considered, weren't quite up to snuff, or at least not good enough to go into a spring garden showing.

Now they are, so visitors will have more designs, plants and theories to argue about—part of the fun of garden week being, apparently, not only admiration, but argument.

Customer—"Are those eggs fresh?"

Grocer (to assistant)—"Feel those eggs, George, and see if they're cool enough to sell."

It is the forest that has been felled once that is most difficult to get through, for there a secondary growth of lawless, shrubs and vines mingles with the taller trees.

WHAT HO!

—By—
RICHARD CONNELL

By Arrangement With Thomas
Allen, Publisher, Toronto.

CHAPTER VIII.—Continued

He scaled Lester's Wall, not soaring over it, but scrambling laboriously over it, and made his way to the fox burrow. He expected to find the fox going about its domestic duties innocent of the conspiracy afoot, to deprive it of its brush and its future.

He saw no fox. He approached the entrance to its subterranean abode. Ten yards from it he stopped short. At his feet the green grass was stained with red blood. Now he understood the full meaning of a remark Captain Duff-Hooper had made at dinner the night before.

"We should have jolly good sport," the captain had said. "Farmers report numerous foxes in the neighborhood. This morning Lord Felstone's pack had a splendid run. The fox nearly got to earth but they finally made the kill in Kingsley's Cope."

This then must be Kingsley's Cope, and that arterial smear the life-blood of the homing fox, mangled in its own front-yard, just two frantic leaps from sanctuary.

Ernest gave out a sound half groan, half oath.

"Too late," he said.

He bent down to examine the entrance to the hole. He smelled a foxy smell. For some reason, at that moment, he felt an impulse to run back to the castle and tug Duff-Hooper on his buck teeth with a heart-felt lameness.

As he was about to turn away from the hole, he heard a sound which started off as a defiant bark and ended in a frightened whimper. Thrusting his arm to the shoulder into the burrow, he touched fuzz. He drew out a feebly quivering cub. The little creature made it plain that after waiting all night for the return of its mother, it was very hungry. Ernest stowed the cub under his coat to keep it warm. He was in no danger of sharing the fate of the legendary Spartan savior, for the orphan was so young it could not bite, only nuzzle.

Ernest conveyed his captive cub to the castle and smuggled it up to his tower room. He made no mention of it to any one for he had a feeling that they might consider that he was giving aid and comfort to the enemy in this one-sided war.

Having bedded the cub down on his overcoat in a closet, he tugged the bell-rope and summoned Sloat.

"Get me a jug of warm milk at once, please," Ernest said.

"Very good, sir."

"And see that a jug of milk is brought here every morning and evening."

"Yes, sir."

"I intend to take milk baths," said Ernest. "I hear they are good for the complexion."

Sloat departed to get the milk and to spread the news of this latest vagary of the mad American.

His soft-footed return found Ernest in the closet soothing the cub by stroking it. Ernest popped out of

the closet and slammed shut the door.

"Thanks, Sloat," he said, taking the jug.

A plaintive whine came from the closet.

"What's that, sir?" asked Sloat.

"What's what?"

"I heard no sound."

Once again the cub voiced its need for nourishment.

"There it is again, sir," said Sloat.

"It sounds like the cry of a very young baby."

"It is," said Ernest.

Sloat tried hard to remember that a well-trained servant does not show his emotions, especially the most un-British of them, inquisitiveness. But curiosity scored yet another triumph over tact.

"Yours, sir?" inquired Sloat.

"What's that, sir?"

"Boy or girl, sir?"

"One of each."

"How old are they, sir?"

"Born this morning."

"Indeed, sir. And might I inquire, sir, where their mother is?"

"Oh, she's been down away with," said Ernest.

"Done away with, sir?" quavered Sloat.

"Eaten."

"My word!" was all Sloat could say.

He seemed about to flee from this unnatural father and possible cannibal, when Ernest said:

"I'm joking, of course. There's no baby in the closet."

The cub made a liar of him with a yelp.

"I've fooled you, Sloat."

"You've astonished me, sir."

"I'm studying ventriloquism," explained Ernest. "The ear is teaching me to throw my voice."

Sloat relaxed.

"I should like to learn how, sir. I could teach Cook."

"The cub nuzzles success fairly lusty for one so young."

"Am I good or am I good?" said Ernest.

"Marvellous, sir," said Sloat. "I could swear there was baby, or a young animal in there."

"What's what practice does," said Ernest. "You may go now, Sloat."

"Thank you, sir," said Sloat, and bore his latest bulletin from b:dam to a waiting servant's hall.

Among those into whose receptive ears Sloat poured this and other tales of the corymbic conduct of the castle's tenant was Babette, maid to the Duchess of Beddingham. Babette was from the south of France, of the race of Tartarin of Tarascon, which produces many poets but few reporters. The narrative with which Babette regaled her mistress while putting on that lady's evening face did not lack color however it may have dimmed on the score of accuracy.

"Quel type d'homme!" said Babette. "It is a toque."

"Don't jabber," said the duchess. She was an extensive lady known in her circle as "High-pockets."

"It is cracked in the kettie, that's monstrous American," said Babette.

"Shouldn't wonder," drawled the duchess. "Must be if he's a friend of George Bingley."

"This so doll one keeps begs in his closet, and never wears the clothes," went on the maid.

"Never? Frugal of him," said the duchess.

"But he is of a richness formidable," said Babette clutching on an eye-brow, "and, on dit, he has the sheep's eyes for Lady Rosa."

"Mummmmm," said the duchess. "Thought she was booked to marry that stick of a tin soldier."

"The betting in the servants' hall is even money to the contrary, Madame la Duchesse."

The Duke of Beddingham, Bumpy in his intimacies, came in to dress for dinner. He was an angular, box-chatter-box stopped by the weight of a moustache shaped like the horns of a water-buffalo. He had attempted to dye it red but it had come out an off-shade of purple.

As he insinuated himself into his

stiff shirt his mate relayed to him the tid-bits about Ernest.

"Fella belongs in a loony-bin," said the duke. "Old Blago was yarning about him at the club. Says he's not a bad sort, really, and scandalously rich. Why, the fella stumped up a thousand of the best for a month's rent of this old hut without batting an eye."

"Babette says he owns the Mississippi River."

"Girl always exaggerates," said the duke. "Doubt if he owns more than half of it."

Dressed, he transported himself and mustache to the Great Hall, had three quick neat breakfasts, and passed on his version of the Ernest saga to a fellow guest, Major General Sir Frederick Cowley, K.C.B., known in the artillery as "Mooley Cowley" because of his name and a noticeable resemblance to that useful animal.

"Fella has a closeful of squawling babies, shoots foxes, and thinks he somebody in 'Ivanhoe'; but he owns most of the Mississippi River," said the duke.

"Fancy!" said the major general. "Think I'll broach the subject of a slight loan," said the duke, "say five thousand for a starter."

"Shouldn't."

"Why not, Mooley? Fella's a Yank. All Yanks have a weakness for titles. And I'm a real duke, aren't I? I'll wager you sixpence the fella'll be tickled pink to let me have say, ten thousand—"

"Doubt it."

"Nobody is that crazy."

"You're probably right," said the duke, sadly. "Well, Mooley, old sprout, here's mine in your wig."

"Toot-loot," said Sir Frederick, and they clinked glasses.

Sir Frederick handed on to the Hon. Mrs. Forde his information about Ernest, and she told Ronald Pym, and he told Lady Gladys Wotton, and she told Countess of Bathberry and she rushed to the powdering-room to scribble down the data for use in the next "Dancing With a Dowager" column, which, under the pseudonym of "Godiva Gadabout," she conducted in one of the largest London dailies.

Ernest, unaware of the interest with which his advent was hailed, was playing nurse-maid to the fox cub behind locked doors, when he heard a thumping at his door.

"Who is it?" he called out.

"Me. I," replied the voice of the Earl of Bingley. "May I come in, please?"

"One moment," said Ernest.

He bent close to the little fox.

"Now be a good cub and keep quiet," he whispered.

The cub, full of milk and contentment, was licking the polish on Ernest's best shoes as he closed the closet door on it.

Ernest admitted the earl who was wearing the dinner suit he had acquired on his return from the Boer War. Already the bow of his black tie had ridden around his collar and was diving out of sight.

The earl sniffed.

"I say, what sort of perfume do you use, Ernest?" he asked.

"I never use any, sir."

"Don't you notice a rather racy aroma?"

"No, sir."

Magic Eye For Pilots

Bomber Crew Can See Town 50 To 100 Miles Away

J. L. Baird, television pioneer, who left for Australia, disclosed that during the voyage he would carry out experiments with a "magic eye" to enable ships' pilots to see through fog for a distance of 30 miles.

Mr. Baird said he had already carried out experiments in an airplane at Crystal Palace.

"The set, which can be comfortably carried in the cockpit of a plane, enables the crew of a bomber to see on a ground-glass screen a town from 50 to 100 miles away," he declared. "The invention can be used for reconnaissance work, and will be invaluable to scouting planes, enabling them to ascertain the position of troops who are deployed."

Named For Notables

When Princess Marina reached out a paw and struck Queen Mary in the nose, R. B. Bennett interfered and soon all three of Miss N. G. Milton's pet cats were rolling over the floor.

Miss Milton of Galt, Ont., has a big collection of moustaches, although King George and Mackenzie King died recently. She doesn't like calling them "kitties."

GIN PILLS FOR THE KIDNEYS

Drama Festival Adjudicator

Eminent Drama Editor And Critic Of New York Has Been Appointed

An eminent Toronto-born author, drama editor and critic, Barrett H. Clark of New York City will act as adjudicator of the Dominion Drama festival to be held in Winnipeg May 16-21 inclusive.

Colonel H. C. Osborne, honorary director of the Dominion Drama Festival, announced that Mr. Clark had accepted the invitation to adjudicate the festival finals.

Mr. Clark was born in Toronto in 1890 and was educated at the University of Chicago and the University of Paris. Shortly before the war he began to take an active interest in the theatre in Europe and wrote and published translations of French plays.

He also contributed articles on the European theatre to prominent New York newspapers and later became regular critic and occasional contributor to various American magazines.

His theatre activities have been manifold. He was dramatic director for the United States War department at Camp Humphreys, Va., in 1918; associate director, foreign language information service, Washington and New York; play reader for the Theatre Guild and on the board of directors of the Group Theatre and Theatre Union. At present he is executive director of the Dramatists Play Service Incorporated of New York.

Among books he has written are "Theater of Drama of Today," 1914; "The British and American Drama of To-day," 1915; "European Theories of the Drama," 1918; "Eugene O'Neill, the Man and His Plays," and "An Hour of American Drama."

Mr. Clark has published a number of pamphlets on Paul Green, Maxwell Anderson and other playwrights and has in preparation, "Recollections of George Moore."

Last year's adjudicator for the Drama Festival finals was Michel St. Denis, noted French playwright and stagecraftman, who operates a theatrical school in London.

Charger For King George

Metropolitan Police Horse Won Prizes For Being Well Trained

The Metropolitan Police has made June, which won the King George V. Cup for the best trained horse at the Richmond Royal Horse Show in 1933 and 1934, has left its stable at Richmond police station to become one of King George VI's chargers. June is 11 years old and has been at Richmond since 1931. At the Royal Horse Show she did not take any notices of flags, umbrellas and rattlers waved at her by Sir Walter Gilbey and other adjudicators. She won the gold cup presented by Lord Lonsdale for the best trained horse at the Metropolitan police show at Timber Court in 1933 and 1934.

Shuns Everything Modern

The church at Downe, England, birthplace of Charles Darwin, is still lighted by candles. The village scorned such modern conveniences as electricity, gas, movies, railway stations, or sewage systems, although it is situated just 20 miles from London.

Because of the pearly lustre of the animal fells from which the product originally was made, the name margarine comes from the Latin margarita and Greek margarites, meaning a pearl.

Will No Longer Be Used On British Battleships

The torpedo, so-called excess baggage on capital ships, no longer will be used on British battleships. It is still, however, considered one of the most potent armaments carried by smaller craft. Consequently the most modern British destroyers are being fitted with 10 torpedo tubes, instead of four mounted by the pre-war vessels.

Britain's five new battleships of the King George V. type are being designed without torpedo armaments, while fittings are being removed from other ships as part of general reconditioning plans.

The Cathedral of Seville, Spain, is the second largest Gothic edifice in Europe. It was dedicated in 1402 and contains the tomb of Christopher Columbus.

For examination of metals and exploration for porosity in castings, X-rays are now commonly used by metallurgists and research laboratories.

Refused To Give Up

Fastest Mile Run By Boy Who Overcame Handicap

For man to run a mile in four minutes has long been regarded as on the verge of the impossible. Those who know something of the limit of human capacity have hesitated to say it could not be done. But they have pointed out that the fastest mile ever put together on paper—a composite of the fastest quarters run by Taber, Lovelock, Cunningham and San Romani—adds up to three minutes and 58.4-5 seconds. Thus the "dream mile" could be no more than 10 yards or so slower than the greatest composite runner at the distance.

At Hanover, N.H., two whole seconds were clipped from the world mark, to bring the four-minute mile appreciably nearer the range of the possible. Glenn Cunningham, who a few weeks ago had told an interviewer that some day someone would hit 4:04 "but it won't be me," came within two-fifths of a second of belying his own prophecy. His time was four minutes and 42.5 seconds. The fastest mile before this had been run by the London bank clerk, Wooderson, on a heavy track. A race between this pair, under conditions as nearly ideal as those at Hanover, would be far beyond the ordinary capacities of men. It would be a pleasing consummation to all sportsmen if the dream mile, whoever he is, were such a representative of the power of human resolution to defeat the cruelties of fate.—Detroit News.

Would Control Bootleggers

Want Amendment To Liquor Control Act In B.C.

Vancouver police commission has decided to request Attorney-General Gordon Wismer to introduce in the British Columbia legislature an amendment to the Liquor Control Act giving police authority to declare bootlegging establishments public places within the meaning of the act.

Chief Constable W. W. Foster said that until the act was amended "it is absolutely impossible to enforce the nearest form of control which it was apparently intended to exercise."

A Lucky Accident

Opened Way To Fame And Fortune For Screen Actor

It was 20 years ago that Andy Devine, a child of 3½ years, tumbled off a couch in the family's modest little home in Kingman, Arizona. Clutched in his fingers was a long, supple silver of wood, which the child had slipped from the seam of a window shade. The little stick broke, a jagged end punctured Andy's throat—and there was set in motion a strange series of physiological disturbances that eventually led Andy to the gates of fame and fortune. That unhappy incident marked the birth of the now famous "gravel voice," a low rumbling disturbance or a high screaming whine that Andy is able to control at will—and which, counting screen and radio contracts, nets him in the neighborhood of \$3,500 a week.

Liner Of The Future

Will Be Streamlined Glass-Enclosed—Speedboat Is Prediction

The Atlantic liner of the future will be a streamlined, glass-enclosed speedboat capable of making the trip from New York to Southampton in 3½ days.

This wonder ship was outlined by M. Pierre de Malgaigne, of the French Line, and A. C. Hardy, engineer, in a paper read at the Institute of Marine Engineers.

Air in the enclosed vessels would play games on the upper decks without being buffeted by winds or annoyed by gases from the funnels. Temperatures would be regulated in accordance with the weather.

Found After Many Years

Former Private Receives Bible Lost On French Battlefield

Twenty years ago, somewhere in the mud of a French battlefield, a private in the A. E. F. lost the pocket Bible he had carried from his Minnesota home. A letter from Australia recently told him it had been found at Queanbeyan, Australia, and would be forwarded if he would communicate with the finder. The Bible's owner is now Rev. Samuel T. Berg, pastor of the Mosses Hill Church near Loomis, Nebraska.

Grandfather used a roller towel, a comb suspended from a string and a dipper shared by all, and lived to be 86. Grandson fights germs and dies exhausted at 50.

The largest open-pit iron ore mine in the world, near Hibbing, Minn., contains over 70 miles of railway tracks over which ore is hauled to the surface.

How Are Life Insurance Funds Invested?

Answer.—In government and municipal bonds and debentures, first mortgages and other securities.

Question.—What do these investments accomplish?

Answer.—They help to finance the undertakings of our Federal and Provincial Governments—our municipalities—our industries and public utilities. They also aid in building new homes and schools—and in improving farms.

Q.—What is the total amount of Life Insurance funds invested in Canada?

A.—More than Two Billion Dollars.

Q.—What does this sum represent?

A.—It represents the accumulated savings of more than 3,500,000 Canadian men and women.

Q.—How do I benefit from these investments?

A.—Through good roads, new schools and local improvements made by your own municipalities, which, in turn, create employment.

Q.—What is the guarantee back of these invested funds?

A.—The security of the individual loans, in addition to the integrity of the borrowers—whether governments, corporations, or individuals.

Q.—Have the Life Insurance companies of Canada kept faith with their policyholders?

A.—Yes. In good times and bad, they have fulfilled every guarantee 100 cents on the dollar.

This is the fourth of a series of messages sponsored by Life Insurance Companies operating in Alberta. The fifth to appear in two weeks' time, will discuss Life Insurance investments in Alberta.

Injuries Fatal To Banff Editor

E. S. Duncan Struck by Car; Driver Faces Manslaughter Charge

E. S. (Sid) Duncan, well known Alberta weekly newspaper editor who had published the Banff Craig and Canyon for the last 10 years, died at noon Tuesday in the Banff Mineral Springs Hospital.

Mr. Duncan was injured Thursday evening beside the highway near the east park gates, when an automobile, reported to have been driven by Howard Deegan, struck him. He was taken immediately to hospital, suffering a fractured leg and other injuries. A charge of manslaughter has been laid against Deegan.

It is believed Mr. Duncan was sitting at the side of the road after assisting a motorist who had driven off the highway. He was waiting for Mr. Deegan's car to come along to take him to a hockey game in Canmore. Mr. Duncan's son, Norman, was riding with Deegan in the car when the accident occurred, and will appear as chief witness.

Round About Town

It's a good thing that our east-bound train comes in at 3:08 and not 3:48 or one young lady would have looked two hours slegier than she did on Tuesday. At least we suppose, the train whistle was a signal to go home.

The hour was quite late and two cars moved staltily out of town. What could give them courage to battle mud? But an eloquent Weir eyebrows raised and beards put together. Froled again and how. Nothing but a business trip.

We hear a few young folks would like to start another column. We wonder why, surey you're doing your share by supplying gossip for this one.

Who were the two young ladies that stayed up half the night to be serenaded on the radio? Better luck next time girls.

We hear one lady was hugging another one's hubby all evening at the last dance. What did her boyfriend think of all this—you'd be surprised.

We wonder why a certain young lady has not yet departed for greener pastures. Is it because the parting is so hard?

"Spring is in the air." Here are a few examples of its wonder working. Our telephone operator is much happier, so is the night operator at the station.

A young couple was seen out walking on Sunday and guess what the gentleman was carrying—a bouncing baby boy! Congratulations.

Where were all the married folks Friday night? Not one young man enjoyed himself because he was not being pursued by the married ladies and do boys' love being chased.

The young gentleman [?] that hit his heart to a star is rising rapidly. We hear he won a prize in the St. Hopkins amateur hour. Maybe that's how he won a heart also.

Mr. H. Coates arrived home last week after a months visit with his daughter and family who live in Geber, California. During his visit there he made a trip to San Francisco in order to look over the big bridges across the Golden Gate and Oakland Bay. The suspension bridge across the bay is the longest span of any of hat type of bridge in the world.

WE OWE YOU MONEY

Payable in CASH—ON DEMAND

★ ★

IF yours is one of the 4,740,000 accounts in which people have dollars on deposit in Canada's chartered banks, your bank owes you money.

That money does not belong to The People, the government, the nation, or to your neighbour. It is YOURS.

If you are a savings depositor, the bank, in addition to providing safety, pays you interest on YOUR MONEY just as a borrower pays interest to the bank, for

WHAT IS A BANK?—It is an institution organized to receive deposits and to make loans; that is the mechanical description. But it is a much more human place than that; it means much more to YOU.

Your bank is a place where you can deposit money for yourself and your family, with every assurance that you can get it back whenever you call for it—in full and with interest.

The bank's books show your deposit as a sum of money it owes to you—must pay to you when you ask for it—a liability of the bank.

Your bank is, too, a place where persons worthy of credit may borrow for business or other legitimate purposes.

The borrower must be worthy.

By worthy, we mean that because of his record for honesty and integrity, his business ability, and the things he owns, he may be counted on with reasonable certainty to be willing and able to repay. We MUST know that he is a "good risk", for we MUST keep YOUR deposit and those of all other depositors SAFE, against the day you call for what WE OWE YOU.

As a depositor, you are our creditor; we have to be prepared to pay you in full. Therefore we must do our utmost to collect in full as much as we loan, plus costs of operation.

We pay interest for deposits and charge interest on loans. You will be surprised when we tell you the range of our costs, the smallness of our margin of profit.

Bank deposits are the money of certain people—not "The People". There is the substance of Canadian banking as plain as a pikestaff. You have known it for a long time; you can let others know just *where* money it is they speak of, when they talk about the community's claim to bank deposits.

More than 4,700,000 people in Canada—equal to more than 42 per cent of Canada's population—have "money in the bank"—deposits lodged with Canada's chartered banks. Of these no fewer than 4,081,000 are savings

depositors receiving interest on their money.

Canada's chartered banks have paid over \$397,000,000 in interest on deposits in the last ten fiscal years.

Savings of the Canadian people, deposited in the chartered banks, now total nearly \$1,584,000,000—the average savings deposit being \$387.

There are about 660,000 current accounts of individuals and corporations totalling \$679,000,000 in Canada's chartered banks.

It takes the equivalent of nearly three average savings accounts to make one loan of \$1,000.

And it takes the net profits, over and above the costs of doing business, on scores of loans of \$1,000 each for a year, to make up the loss of one single loan of \$1,000.

This shows what care the banks must take in lending, if the depositors' funds are to be safeguarded, for the net profits of banks are less than our half of one per cent, on their total assets.

Without deposits a bank could not long continue in business. YOUR MONEY remains on deposit in the bank ONLY AT YOUR WILL, and if you think the bank is leading recklessly, you will draw it out.

The bank must always keep itself in a position to pay you your deposit, in full, in cash, whenever you choose to call for it.

Canada's chartered banks realize that the establishing of your home, the happiness of your family, the education of your sons and daughters, their start in life, their progress in business, your provisions for a rainy day, your peace of mind in the twilight of life, may depend largely upon this money—money you have deposited in a bank—money YOUR BANK OWES TO YOU.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

Curling Notes

Well another successful season of curling has come to an end and we are sure that everyone enjoyed taking part in this fine winter pastime. On looking back over the records we see that F. Morrell's rink was the outstanding rink of the year winning three first prizes in the b'nspels, finishing first in one of the square draws and setting a record of ten straight triumphs in cup play. The most remarkable rink of the year was that of G. Aitken. They had the honor of laying a seven ender and also delighted in giving their opponents a good lead and then overtaking them. As for the luckiest curler, J. Gingles gets the nod over G. Aitken with Alice Levick not far behind. The person to whom the honor goes for the brom must consistently well it there was so many who did that we couldn't single out any certain one. But there is one thing we cannot pass by without mentioning, and that is, the new curlers show very promising signs of developing into regular curlers. (those who always make their shot but if miss blame it on the ice)

"Could I speak to Mr. Knight, please?"
"Just a moment and I'll connect you with his room."
"Is that Mr. Knight speaking?"
"Yes, this is Mr. Knight."
"I'd like to see you about a matter in connection with the stampede."
"O, you don't want to see me. You want to see Mr. Ray Knight."
"I thought I was talking to Mr. Ray Knight."
"Well, you are, but it's the other Mr. Ray Knight you want to see."

This was the performance repeated about a dozen times at the Water Hotel on Saturday afternoon as two Ray Knights found themselves registered at the same hotel. One was the well known ranchman, just returned from a visit in New York and Eastern Canada. The other was Ray Knight of Vancouver, who is connected with the Sunburst Oil Co.

STANDARD

Above and beyond the standardized processing of ALBERTA BEER by skilled Brewmasters, is the standard equipment in use at all Alberta Brewing Institutions. True they use the old formulas and the choicest of ingredients, but the methods of control are infinitely finer. Modern equipment, improved plant construction, and handling facilities contribute greatly to the high STANDARD maintained in the manufacturing of ALBERTA BEERS.

the BREWING INDUSTRY of ALBERTA
"BEERS THAT ARE BEST"

Messrs. H. J. Westphal and W. C. Agar, of Cereal, attended a Joint meeting of the Agricultural Improvement Association and the Supt. of Sub Stations, which was held at Lethbridge on March 16 and 17.

The Ladies Card Club met at the home of Mrs. Gallagher last week. Honors were shared by Mrs. Morrell and Mrs. Gallagher. The ladies will meet next week at the home of Mrs. Lee.

Westerner's Cattle

Neglected in East

Preston, Ont. (CP)—Humane Inspector W. S. Weigand charged yesterday that eight cows being pastured by a farmer in this district for a Western Canadian farmer were in an "appalling state" due to starvation and unsanitary conditions.

The herd, which originally numbered 12, was brought here from Western Canada's drought area. In return for pasturing the animals the farmer was to retain four head. Weigand found four of the 12 cows were found to be well fed and properly stabled and the remaining eight in serious condition.
